Company Profile:

Tadeo Services LLC is a Women Veteran-Owned Small Business (WVOSB) based in Columbia, Maryland, specializing in workflow development, training solutions, DoD platform integration, and creative communications support for government, defense, and commercial organizations. The company delivers practical solutions that improve operational readiness, streamline knowledge transfer, and enhance organizational effectiveness.

Core Capabilities:

Program Management

- Develop and maintain project scope, engineering technical requirements, budgets, actuals, forecasts, and schedules using MS Project and MS Project Online, while managing Agile workflows through Jira Kanban, Sprint, and REA Boards to track tasks, dependencies, deliverables, and milestone targets.
- Perform resource loading and forecasting using Anaplan, manage project risks and issues, facilitate weekly and monthly Program Management Reviews (PMRs), and prepare financial forecasts, status updates, performance metrics, and mitigation strategies for leadership.

Training & Workflow Development

- Develop and maintain Technical Manuals, Quick Start Guides, Student Guides, lesson plans, PowerPoint training materials, and Operator/Maintainer Tasks supporting equipment operation, troubleshooting, maintenance, and instructional requirements.
- Integrate Technical Manual and training data to ensure consistency, effective knowledge transfer, and optimum knowledge retention; deliver technical training to end users, students, coworkers, and T2/T3 trainers while adapting complex technical information for effective instruction.

Integrated Logistic Support

- Perform Integrated Logistics Support (ILS) analyses, including Reliability Analysis, Troubleshooting Procedures, Maintenance Task Analysis, FMECA, and Maintenance Concepts, to support Level of Repair Analysis (LORA) and CDRL deliverables.
- Integrate logistics analysis data into LORA, Technical Manuals, Maintenance Manuals, Field Service Support, and Training products; develop, review, and update LORA deliverables including feeder data, technical revisions, change logs, configuration management, and revision control.

DoD Platform Integration

- Light Weight Vehicle Surveillance System **(LVSS)**
- Fixed Surveillance System and Counter-UAS (C-UAS) Capabilities **(Argus XL ADA C-UAS)**
- Long-range Counter Unmanned Aerial Systems (**Cerberus XL C-UAS)**
